Sonipat, Haryana – 131001

TECHNICAL SKILLS

Language & Framework	Python, Machine Learning, SQL (basic)
ML/DL Frameworks	PyTorch, TensorFlow, scikit-learn, Pandas, NumPy, Matplotlib, OpenAI Gym
Tools & Libraries	Git, GitHub, Google Colab, VS Code, Pandas, NumPy, Matplotlib, Seaborn
Automation & AI	LLMs, Prompt engineering & structured outputs, AI coding assistants(Replit, Google AI Studio, ChatGPT), Workflow pipelines (n8n), Voice Agents (VAPI.ai)

WORK EXPERIENCE

EddyTools Tech Solutions - Trainee Software Developer (Remote) Sept 2025 - Nov 2025

- Designed and tested n8n automation workflows: event invitation system (Google Sheets + Gmail, 20+ entries), daily AI news digest (GPT-4.1-mini summarizes 4-5 articles, 7AM email), and resume matcher (webhook, 10+ resumes) eliminated 100% manual data entry for events and fully automated resume screening
- Worked across full workflow lifecycle—from requirement to build to testing(n8n logs proof) to documentation—following Agile practices and SCRUM guidelines (daily attendance via status updates & realtime task tracking in SCRUM Sheet)

PROJECTS

Voice-Based Assistants  Jul 2025 - Oct 2025

Conversational AI · System Prompt Tuning · VAPI.ai · Deepgram · ElevenLabs · GPT 4o Mini

- Engineered 2 AI voice agents (I-Bot for interviews, Maria for collections) using a real-time pipeline (Vapi + Deepgram + GPT-4o Mini + ElevenLabs) to automate repetitive calling workflows with context-aware, adaptive dialogue
- Processed 106 calls (~103.5 mins) with ~59 sec avg duration and ~\$0.09/call cost; improved system robustness by testing 40+ failure scenarios (eg, silence timeouts, interruptions) and refining prompts and fallback logic.

Reinforcement Learning & Data Visualization Feb – Mar 2025

Python · PyTorch · OpenAI Gym · Pygame · Matplotlib

- Implemented Q-learning, SARSA, DQN (CartPole), DDPG (Bipedal), and Tic-Tac-Toe over 500+ episodes.
- Generated Q-table heatmaps, reward graphs, and real-time simulations.
- Applied PCA and K-Means on Iris dataset achieving 92% classification accuracy.

Computer Vision & DBMS Projects Sep – Dec 2024

Python · Image Processing · MySQL

- Built end-to-end CV pipelines using histogram equalization and geometric transformations.
- Implemented Canny, HOG, DoG feature extraction with classifiers achieving 85% accuracy.
- Designed 10+ relational databases and performed complex SQL joins and aggregations.

EDUCATION

Vellore Institute of Technology Nov 2022 – Apr 2026

B.Tech Computer Science Engineering (AI & ML) **8.51 CGPA**

COURSES

- AWS Solutions Architect - Associate Certification Program | **Ethnus** | Apr 2025
- AWS Academy Generative AI Badge | **AWS Educate** | Apr 2025
- AWS Academy Machine Learning Foundations Badge | **AWS Educate** | Apr 2025
- Computer Vision | **Vityarthi** | Nov 2024
- Applied Machine Learning in Python | **Coursera** | Dec 2023

LANGUAGES

English – Working Proficiency

Hindi – Professional Proficiency

Haryanvi – Native Language
